

The screenshot shows the Amazon S3 console interface. On the left, there's a sidebar with navigation options like 'Buckets', 'Access Points', and 'Storage Lens'. The main area displays an 'Account snapshot' and a list of three buckets. A blue arrow points to the bucket named 'my-855249081817-bucket'.

Name	AWS Region	Access	Creation date
cf-855249081817-bucket	US East (N. Virginia) us-east-1	Public	May 18, 2022, 14:25:35 (UTC+01:00)
my-855249081817-bucket	US East (N. Virginia) us-east-1	Public	May 18, 2022, 14:13:37 (UTC+01:00)
web-855249081817-bucket	US East (N. Virginia) us-east-1	Public	May 18, 2022, 13:20:59 (UTC+01:00)

CREATED BUCKETS (MY-855249081817-BUCKET) IS MY UDACITY PROJECT BUCKET NAME Others are knowledge testing

The screenshot shows the details page for the bucket 'my-855249081817-bucket'. The 'Objects (4)' section is active, displaying a list of objects. The objects include three folders ('css/', 'img/', 'vendor/') and one file ('index.html').

Name	Type	Last modified	Size	Storage class
css/	Folder	-	-	-
img/	Folder	-	-	-
index.html	html	May 18, 2022, 14:20:56 (UTC+01:00)	6.1 KB	Standard
vendor/	Folder	-	-	-

Public

Block public access (Bucket settings)

Public access is granted to buckets and objects through access control lists (ACLs), bucket policies, account policies, or all. In order to ensure that public access to all your S3 buckets and objects is disabled, turn on Block all public access. These settings apply only to this bucket and to access control lists (ACLs) recommendations that you turn on. Before applying any of these settings, ensure that your applications will apply correctly without public access. If you require some level of public access to your buckets or objects within, you can customize the individual settings below to suit your specific storage use case. [Learn more](#)

Object Ownership

Control ownership of objects within the bucket from your AWS account and the use of access control lists (ACLs). Objects inheriting permissions also can specify access to objects.

Edit

Object Ownership

Bucket owner enforced

ACLs are disabled. All objects in this bucket are owned by this account. Access to this bucket and its objects is controlled using only policies.

Access control list (ACL)

Quick basic read/write permissions to other AWS accounts. [Learn more](#)

Edit

This bucket has the bucket owner enforced setting applied for Object Ownership

When bucket owner enforced is applied, the bucket policies to control access. [Learn more](#)
